TeleMeetUp™ with
MRESENCE

TMU-Authenticate™

A Better Way to do Legal Paperwork when the parties must do so AloneTogether during Novel Coronavirus Outbreak

TMU with MRESENCE™ enables

- Authenticated interactions in multi-media

- Enhanced clarity of explanation and detailing with
  - SWIS (See What I See) & TWIT (Touch What I Touch) functions
  - White-boarding – handwriting, drawing & sketching

- Screen-sharing to show documents and images as required in real time

- Native Language Chat with automatic translation in real time enables multiple parties writing/speaking in different languages to converse with one another with each getting the other's text/speech in a chosen language

- Display in one same screen the image capture of multiple sites of various parties in real time with facility to enlarge/reduce a particular image with double tapping

- Automatic recording of all interactions in multimedia in one continuous session and archiving them with hashed blockchain security and authenticity for use in posterity

- TMU with MRESENCE™ is available in 3 formats:
  - web version to run in PC or in Mobile Handset with browser
  - iOS App version
  - Android-OS App version

Users may use any of the 3 formats of TMU to interact with one another.

Audio & Video Conference with Presence in Mixed Reality among people geographically apart Anywhere, in Any Situation

Everything you want to be able to do
In One Continuous Session !
