

## Accessing the Call Details

To access the call details, after logging on, click on all calls, and choose the call you'd like to get the details for.

Depending upon if you are the host/invitee, you can start or join the call using the available option.

If the call has already been completed, you can get its details, like duration, chat messages, whiteboard activities, and can also get the recording of it, if you have that option enabled during the call.
